Integrated Takeoff Software

Integrated Takeoff and Estimating Increases Productivity by 50%

eTakeoff is electronic takeoff software that works together with Sage Estimating so you never have to manually key takeoff data again. With eTakeoff, you significantly increase accuracy, productivity, and speed over antiquated takeoff methods. It works in 3 simple steps:

1. Takeoff
2. Fine-Tune
3. Send to Estimate

Assembly	Description	Takeoff Quantity	Labor Price	Labor Amount	Material Price	Material Amount	Total Cost/Unit	Total Amount

Key Features

Here's just some of what makes eTakeoff better than the rest:

- Use PDF - no waiting for drawings to convert
- Multiple estimators on the same drawing at the same time
- View multiple drawings while working on takeoff
- Multiple scales on one drawing page
- Database-driven cost information
- Innovative "drill down" from estimate spreadsheet to takeoff source
- BIM integration with industry leaders Autodesk and Assemble Systems

Leveraging these powerful features, you'll boost estimating capacity while producing faster and more accurate numbers. Plus, you'll be up and running quickly with helpful training tools and software that's easy to use.

Improve Accuracy and Bid with Confidence Using eTakeoff!
